ASAD ULLAH

MOBILE APP DEVELOPER

Faisal Town Lahore, Pakistan | +923176854356 | asadbalqani@gmail.com | LinkedIn: theasadsahir

I am a Mobile Developer with over 4 years of experience building and launching apps across healthcare, e-commerce, and enterprise sectors. While my primary expertise is in Flutter, I am a versatile engineer now focusing on iOS Native (Swift/SwiftUI) and React Native development.
I have spent years managing state, integrating APIs, and deploying apps to the App Store, I can contribute to production-level projects in these frameworks immediately. I advocate for clean, modular code that is easy for teams to scale and maintain. I am comfortable taking full ownership of features—from the initial design phase to final deployment—and working directly with clients to turn their business ideas into high-quality software.

EXPERIENCE

Senior Flutter Developer | RootPointers | Lahore
Jan 2025 – Present

- Architected and deployed enterprise OTA (Over-the-Air) update delivery system, enabling seamless app updates without store approval delays
- Implemented automated CI/CD pipelines reducing release cycle time by 40% and eliminating manual deployment errors
- Engineered real-time chat, ticketing, and internal communication modules using Firebase and custom REST APIs, supporting 1000+ concurrent users
- Designed modular Clean Architecture with GetX state management, improving code reusability and reducing feature development time by 30%
- Led cross-platform deployment strategy for Android and iOS, managing production releases and hotfix cycles

Flutter Developer | BritSols | London (Remote), UK
June 2024 – Dec 2024

- Delivered production Flutter applications with custom Node.js backend APIs serving international client base
- Optimized application performance achieving 60fps rendering and reducing startup time by 25% through lazy loading and code splitting
- Collaborated with UK-based technical leads on architecture decisions and sprint planning in Agile environment

Associate Flutter Developer| Ride Options | Lahore, PK
August 2023 – May 2024

- Developed real-time chat system, GPS-based map integrations, and service booking modules for ride-sharing platform
- Refactored legacy codebase improving app stability by 35% and reducing crash reports through comprehensive error handling
- Implemented data security protocols and encryption standards ensuring compliance with privacy regulations
- Established coding standards and review processes adopted across 4-person development team

Junior Flutter Developer | MicroProgramers | Layyah, PK
June 2022 – August 2023

- Built reusable Flutter UI component library reducing development time for new features by 20%
- Participated in Agile ceremonies including daily standups, sprint planning, and retrospectives
- Contributed to testing processes and bug resolution, maintaining 95% code coverage on critical modules

Intern Flutter Developer | MicroProgramers | Layyah, PK
March 2022 – May 2022

- Assisted in UI/UX improvements and debugging for production mobile applications.
- Mastered Git workflows, Flutter framework fundamentals, and mobile development lifecycle

TECHNICAL SUMMARY

- **Languages:** Dart (Advanced OOP), JavaScript, Kotlin, Swift
- **Frameworks:** Flutter SDK, Node.js, Express.js, Next.js (Learning)
- **Tools:** Git, GitHub, GitLab, Azure DevOps, Firebase, REST APIs, MongoDB, PostgreSQL
- **State Management:** GetX, Riverpod, Provider, BLoC Pattern
- **Platforms**: Android, iOS, Play Store, TestFlight, App Store Connect
- **Deployment & Delivery:** Play Store, TestFlight, OTA, Automated CI/CD Pipelines

SKILLS

- Cross-platform Mobile Development (Flutter SDK, Android SDK)
- Full-stack Development with Flutter + Node.js
- State Management Expertise (GetX, Riverpod, Provider)
- Native Interop with Kotlin, SwiftUI
- Over-the-Air (OTA) Update Integration & CI/CD Pipeline Automation
- API Integration (REST, AI, Maps)
- Version Control and Collaboration (Git, GitHub, GitLab, Azure DevOps)

EDUCATION

Bachelor of Science in Computer Science | GCUF (*2023*)
